

Birdman

Q: Means something to who? You had a career before the third comic book movie, before people began to forget who was inside the bird costume. You're doing a play based on a book that was written 60 years ago, for a thousand rich old white people whose only real concern is gonna be where they go to have their cake and coffee when it's over. And let's face it, Dad, it's not for the sake of art. It's because you want to feel relevant again. Well, there's a whole world out there where people fight to be relevant every day.
